

Figure 7.1: Example Logic Model

Applying the [Dissemination and Implementation Logic Model Template](https://dissemination-implementation.org/pdf/Blank%20Logic%20Model.pdf)

<https://dissemination-implementation.org/pdf/Blank%20Logic%20Model.pdf>

Problem / Gap

High rates of child morbidity and mortality from malaria

Evidence-based Intervention or Policy

Malaria treatment for children under 5 years of age

Implementation Strategy(ies)

Community level treatment by community health workers (CHWs)

Mechanisms / Mediators

- CHWs trained in treatment protocol
- CHWs reach community members

Implementation Outcomes

- CHWs deliver malaria treatment according to protocol
- Malaria treatment effectively delivered only to those in need
- Disadvantaged populations far from health centers receive malaria treatment

Long-term Outcomes

- Children under 5 with malaria correctly treated;
- Decreased cases of complicated malaria;
- Community satisfied with malaria treatment by CHWs
