

## Figure 7.2: Questions to think about when selecting a framework

### Does your study seek to?

- Describe:** Understand the implementation problem in detail
- Test:** Compare alternative solutions
- Evaluate:** Assess effectiveness of a new implementation strategy
- Design:** Create a new, locally appropriate strategy

### What phase of implementation will your study focus on?

- Pre-implementation:**  
Preparing for a new strategy and identifying potential barriers and facilitators
- Implementation:**  
Monitoring and adapting an ongoing strategy
- Post-implementation:**  
Evaluating factors that influenced implementation processes and outcomes after the strategy has ended

### How does your research question(s) relate to the specific intervention or implementation strategy you are interested in studying?

- What components does your research question focus on it focus on?
- At what level(s) of the system?
- Which types of stakeholders?
